

bioinformaticsⁱ

Illumina is the only life sciences company developing genome-wide technologies for genotyping, gene expression and sequencing—the three cornerstones of modern genetic analysis. By enabling studies of thousands of patient samples at once, our products set genetic discovery on fast forward. And we're just getting started.

Our bioinformatics team is growing rapidly! This international, multidisciplinary blend of specialists is driven by a strong vision and a commitment to making a major contribution to the scientific community. Based in our European headquarters near Cambridge, England, we currently have multiple opportunities for:

BIOINFORMATIC SCIENTISTS & SOFTWARE ENGINEERS

When you join the high-performing team at Illumina, your work takes on new meaning—to an exponential degree. Our growth, our positive culture and the impact our products are having in the world ignite a passion that drives our people forward. And together, we accomplish beyond expectations.
